

Hydraulic Press Modernization

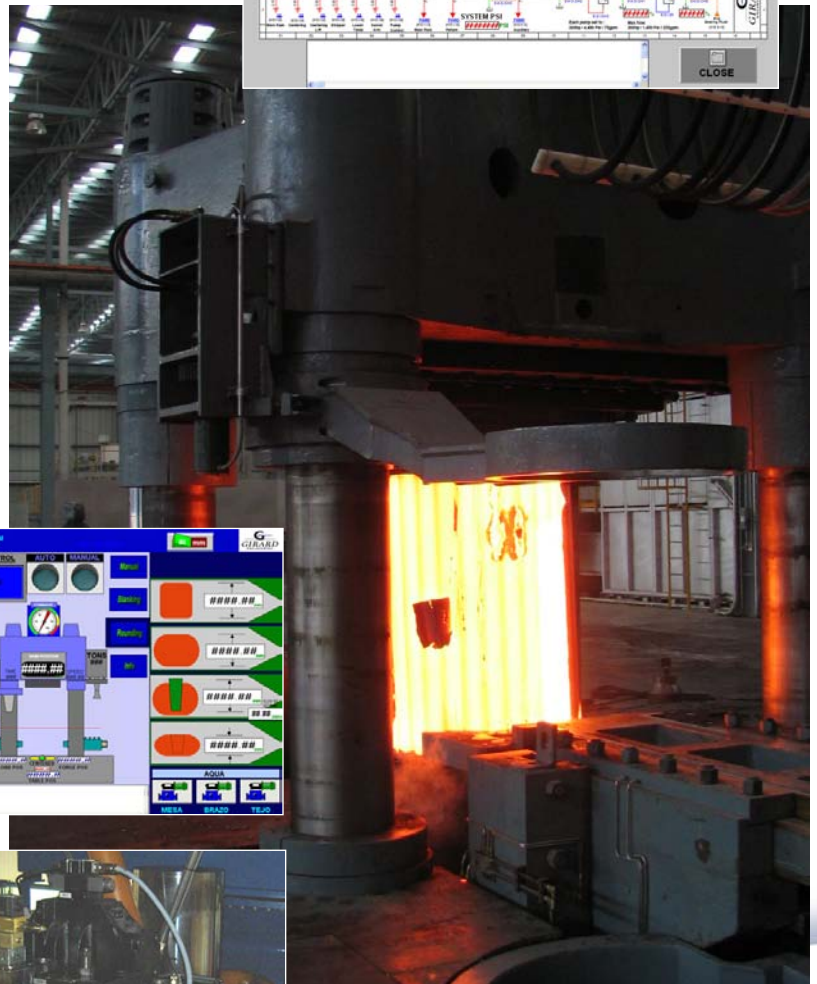

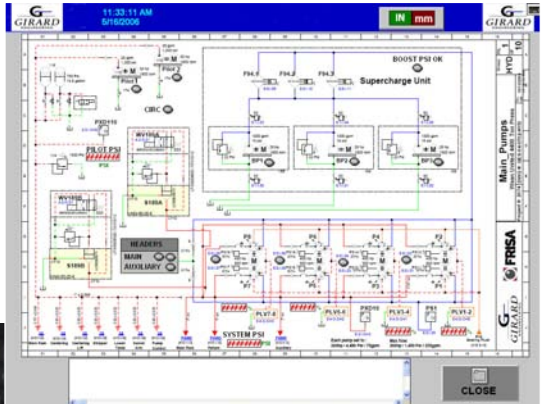

Upgrading your hydraulic press will not only improve part quality, but will also decrease maintenance costs and increase uptime; all with the added benefit of making the machine safer. Girard Engineering can update and retrofit existing systems or supply new, custom designed state-of-the-art controls for your machines to improve process control and keep you competitive.

Modernization Options:

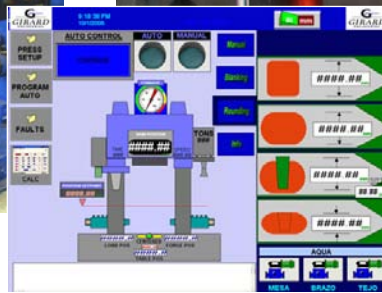

- Complete new hydraulic and electrical systems.
- Complete new electrical system and upgrade of critical hydraulic components.
- New electrical control system utilizing existing hydraulic system.

Service:

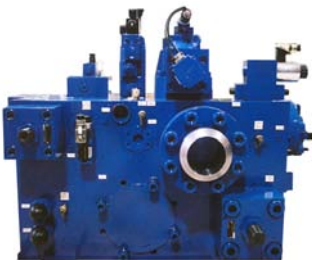

- Unmatched technical support and training.

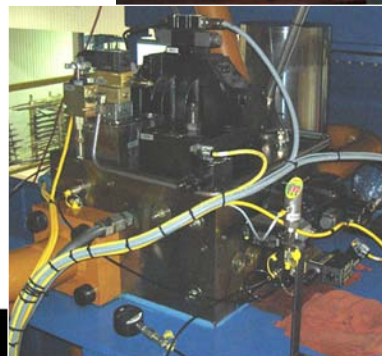

3000 ton press power unit

3000 ton press main manifold utilizing Rexroth valves

3000 ton press main manifold utilizing Parker Valves

Girard Engineering is a proud integrator of the following companies:

Project System Integrator
for robot based automation

ABB
